Kevin D. Hoover : Applied Intermediate Macroeconomics before purchasing it in order to gage whether or not it would be worth my time, and all praised Applied Intermediate Macroeconomics:

2 of 2 people found the following review helpful. For someone who enjoys reading economics textbooks for fun, this book is excellentBy Tony MeyerFor someone who enjoys reading economics textbooks for fun, this book is excellent. It's up-to-date and lucidly written. The study is not too advanced and not too elementary. It was just my cup of tea.0 of 0 people found the following review helpful. this is great for students who want to learn how to dig ...By Daniel M. Sharplots of tie-ins to real data and statistical sources. this is great for students who want to learn how to dig for data and apply it for themselves.0 of 0 people found the following review helpful. Five StarsBy Edzer Jean-JusteIt's a very

good book for the price charged.Edzer

This textbook offers a complete course in applied macroeconomics at the intermediate level that emphasizes the application of economic theory to real-world data and policy. Topics covered include national and international income, financial accounts, business cycles, financial markets, economic growth, labor markets, aggregate supply and demand, inflation, and monetary and fiscal policy. The text is unique in developing a detailed toolkit of elementary statistics and graphical techniques for economic data. A strength is its detailed treatment of national and international financial markets and the institutions of monetary and fiscal policy, which makes it especially helpful in understanding recent economic crises. The Web site for the text is found at <http://www.appliedmacroeconomics.com>.

About the Author Kevin D. Hoover is Professor of Economics and Philosophy at Duke University. A graduate of the College of William and Mary, he received his doctorate from the University of Oxford. He developed his interest in applied macroeconomics early in his career while working at the Federal Reserve Bank of San Francisco. Before moving to Duke, Hoover taught economics at the University of California, Davis, and at Oxford. He is the author of *The New Classical Macroeconomics* (1988), *Causality in Macroeconomics* (Cambridge University Press, 2001) and *The Methodology of Empirical Macroeconomics* (Cambridge University Press, 2001), as well as nine edited volumes and more than 100 academic articles on macroeconomics, monetary economics, econometrics, the methodology and philosophy of economics, and the history of economic thought. He is past chairman of the International Network for Economic Method, the past president of the History of Economics Society and a former editor of the *Journal of Economic Methodology*. He is currently the editor of the journal *History of Political Economy* and a Fellow of the Center for the History of Political Economy at Duke University.
