**Ray Hudson : Approaches to Economic Geography: Towards a geographical political economy (Regions and Cities)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Approaches to Economic Geography: Towards a geographical political economy (Regions and Cities):

The last four decades have seen major changes in the global economy, with the collapse of communism and the spread of capitalism into parts of the world from which it had previously been excluded. Beginning with a grounding in Marxian political economy, this book explores a range of new ideas as to what economic geography can offer as it intersects with public policy and planning in the new globalised economy. *Approaches to Economic Geography* draws together the formidable work of Ray Hudson into an authoritative collection, offering a unique approach to the understanding of the changing geographies of the global economy. With chapters covering subjects ranging from uneven development to social economy, this volume explores how a range of perspectives, including evolutionary and institutional approaches, can further elucidate how such economies and their geographies are reproduced. Subsequent chapters argue that greater attention must be given to the relationships between the economy and nature, and that more consideration needs to be given to the growing significance of illegal activities in the economy. The book will be of interest to students studying economic geography as well as researchers and policy makers that recognise the importance of the relationships between economy and geography as we move towards a sustainable future economy and society.

**About the Author** Ray Hudson is a Fellow of the British Academy, the Academy for the Social Sciences, the Regional Studies Association and the Royal Geographical Society and is a Member of Academia Europaea. He is also a long-standing Professor of Geography at Durham University, UK.
