From Asian Development Bank : Asian Development Bank Sustainability Report 2011 (ADB Sustainability Reports) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Asian Development Bank Sustainability Report 2011 (ADB Sustainability Reports):

The third Sustainability Report of the Asian Development Bank (ADB) offers easily accessible information on ADB's policies, programs, and practices as they relate to the social and environmental sustainability of development in Asia and the Pacific, and on changes in this work that have occurred since ADB published its second Sustainability Report, in 2009. The report also documents ADB's continuing efforts to minimize its corporate environmental impact, especially at its Manila headquarters. For comparability, ADB's current Sustainability Report is structured similarly to its first two. All three reports respond to the latest guidelines of the Global Reporting

Initiative while adapting to the particular characteristics of ADB's work and the many different audiences interested in the information presented.
