**From Auerbach Publications : Asset Protection and Security Management Handbook** before purchasing it in order to gage whether or not it would be worth my time, and all praised Asset Protection and Security Management Handbook:

0 of 0 people found the following review helpful. Four StarsBy CustomerGood handbook for asset protection

The Asset Protection and Security Management Handbook is a must for all professionals involved in the protection of

assets. For those new to the security profession, the text covers the fundamental aspects of security and security management providing a firm foundation for advanced development. For the experienced security practitioner, it provides the tools necessary for developing effective solutions and responses to the growing number of challenges encountered by today's security professionals. Based on the ASIS asset protection course, the text provides information vital to security planning and operational requirements. It addresses the most commonly recognized issues in the field and explores the future of asset protection management. The authors examine the latest in crime detection, prevention, and interrogation techniques. The Asset Protection and Security Management Handbook will not only help you to explore effective security training and educational programs for your organization, but will also help you discover proven methods of selling your security program to top management.

"Overall an excellent book, a lot of valuable information I would give the book 9 out of a possible 10 stars Well organized and well written, the ideas and concepts flow in a methodical and progressive manner. for those who have an interest in the subject matter, the book is a pleasure to read. Excellent and well-documented references it is clear that the author[s] did [their] homework The appendices at the end of the chapters are quite valuable and have a lot of helpful secondary information. All of the information is germane and relevant. the writer[s] really know what they are talking about." -Ben Rothke, CISSP, Senior Security Architect, QinetiQ Trusted Information Management, Inc.
