Li Hejun : China's New Energy Revolution: How the World Super Power is Fostering Economic Development and Sustainable Growth through Thin-Film Solar Technology before purchasing it in order to gage whether or not it would be worth my time, and all praised China's New Energy Revolution: How the World Super Power is Fostering

Economic Development and Sustainable Growth through Thin-Film Solar Technology:

China's Solar-Powered Revolution
China's New Energy Revolution explains how China can tackle its energy bottleneck and achieve a sustainable, peaceful rise by taking the lead in the solar industry. The author covers all the important issues from the vantage points of the economy, society, industry, and business. He explores current and future strategies, policies, and measures that China must take in this round of the new industrial revolution. Finally, he explains why he believes China will lead the world in the solar industry.

About the Author
Li Hejun is the Vice President of All-China Federation of Industry and Commerce, member of the National CPPCC, and President of China New Energy Chamber of Commerce. He is the Chairman and CEO of Hanergy Holdings Group.
