Karl Lintner : Global Regulatory Issues for the Cosmetics Industry (Personal Care and Cosmetic Technology) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Global Regulatory Issues for the Cosmetics Industry (Personal Care and Cosmetic Technology):

This volume examines regulatory issues of ingredients, manufacturing, and finished products, as well as claim

substantiation, packaging, and advertising. A chapter on Chinese regulations will be one of the first about this country to be published in book form. Includes a regulatory map of India and China; Global IP protection strategies; REACH and European Regulatory standards; "Green chemistry" in relation to cosmetics and regulation* Simplifies global regulations for anyone exporting cosmetics.* Excellent reference not only for manufacturing and marketing, but for legal departments and packaging as well.* Describes how to develop a global regulatory strategy.

About the Author Karl Lintner is presently a technical advisor to Sederma and Croda Enterprise Technology. He received his degree in chemical engineering and his doctorate degree in biochemistry from Vienna University. From 1973 to 1983, he conducted research in biological peptides at the Nuclear Research Centre in Saclay, France, resulting in the publication of more than 30 papers in biochemistry and biophysics, essentially on peptide activity. From 1983 to 1989, Lintner was laboratory manager, then marketing manager for product development and worldwide technical support with the Henkel Company, Düsseldorf, Germany. In 1990, he joined Sederma as technical director. During his time in this position, he introduced peptides, synthetic ceramides and the first biotech products as cosmetic ingredients and received numerous patents. From 1997 to the present, Lintner has been managing director of Sederma.
