From Palgrave Macmillan : Globalization, Culture, and Development: The UNESCO Convention on Cultural Diversity before purchasing it in order to gage whether or not it would be worth my time, and all praised Globalization, Culture, and Development: The UNESCO Convention on Cultural Diversity:

This edited collection outlines the accomplishments, shortcomings, and future policy prospects of the 2005 UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions, arguing that the Convention is not broad enough to confront the challenges concerning human rights, sustainability, and cultural diversity as a whole.

'The contributions in this excellently edited and well-balanced collection help foreground and analyze the essential issues and stakes of the often very complex relationships between local, regional, national, international and world culture, from a cultural-political point of view.' - Jan Baetens, University of Leuven, Belgium 'This book brings together a range of papers written by experts in the field who provide a critical appraisal of various aspects of the Convention's operations and speculate about the prospects for its future. The differing perspectives of the authors are sure to stimulate debate about the Convention's strengths and weaknesses.' - David Throsby, Macquarie University, Australia 'By focusing on the impact of the UNESCO Convention, this important collection offers valuable insights on the challenges of translating the contested, but widely used, concepts of culture and diversity into public policy and action, and pathways for making those links more effective.' - Vijayendra Rao, The World Bank

About the Author
Helmut Anheier, Hertie School of Governance, Germany. Nathalie Blanc, National Center for Scientific Research (CNRS), France. John Clammer, United Nations University and Kanda University, Japan. Yvonne Donders, University of Amsterdam, the Netherlands. Carla Figueira, Goldsmiths, University of London. Véronique Guegrave, Laval University, Canada.
