**M. Stigter, C. Cooper : Solving the Strategy Delusion: Mobilizing People and Realizing Distinctive Strategies** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Solving the Strategy Delusion: Mobilizing People and Realizing Distinctive Strategies:

0 of 0 people found the following review helpful. Throw off your mental chains By MisterHobgoblin Solving the Strategy Delusion is a short but very readable text. The authors adopt a conversational style, illustrating their points

with various recent and well known examples. But for all the readability, it is also a masterpiece of concision; it packs an awful lot of thinking into a pretty small package. The central thesis is that strategy fails for various reasons - principally being developed by a small and internal group at a one off group, conflates strategy with strategic plan, is not well understood or communicated even within the Boardroom, let alone to wider staff, and tends to be under-resourced in its implementation. These are not new concepts - they owe a debt to Heifetz and Kotter - but the way they are articulated and made accessible is new. There are also good insights in relating the theory to practice, drawing frequently on recent performance of Fortune 500 companies. The sections that spoke particularly strongly to me were: (a) the need to develop strategy from an outside perspective - and I have tried out the illustration of the North View with colleagues and it works very well and (b) the need to develop a purpose, mission and collective story - which is too often seen as something to be retro-fitted to explain what has been done rather than developed up front as a statement of intent. The authors conclude (and in fact assert up front) that 20th century corporate practices are not fit for purpose in the 21st century; they are not flexible enough or fast enough. I was a convert to the cause already, but feel emboldened by this text. I am grateful to Marc Stigter for giving me a copy of this book. 0 of 0 people found the following review helpful. If Steve Jobs had a strategy book, then Solving the Strategy Delusion would be it! By Benjamin Hawthorn This book is a must read for all, whether an organisational leader or individual life strategist. Stigter and Cooper bust the strategy myth wide open to reveal critical insights that will enable you to realise distinctive strategies relevant in today's volatile, uncertain and complex world! This highly authentic book shows the authors' characteristic flair, frank and incisive approach, and cuts straight through the garbage - that all business or leadership type books waste time wading through - and gets to the point of how to move away from ingrained behaviours that hinder our ability to unlock deep insights and mobilise to make truly distinctive strategies come to life. This makes it an absolute pleasure to read and leaves one seeing, feeling, thinking and acting 'in a true sense' strategically! @ Ben\_Hawthorn 0 of 0 people found the following review helpful. This is a superb book which I have thoroughly enjoyed reading, in spite of a resistance to the ... By David Bowles, Ph.D. This is a superb book which I have thoroughly enjoyed reading, in spite of a resistance to the subject based on experience with other offerings which were too dense and plodding to light up much interest. Instead Marc Stigter and Cary Cooper bring the subject to life while taking on many sacred cows and opening up new and refreshing approaches, many of which apply equally well to those not normally involved with strategy (such as those in my field of culture and employee morale/engagement). I will certainly take the insights learned here to speaking and client consulting engagements, and would highly recommend this book to a broad range of both C-level and mid level managers, as well as internal and external consultants. David Bowles, Ph.D. Rancho Santa Fe, California

Solving the Strategy Delusion matters to anyone interested in realising strategy in the 21st century. The book challenges conventional and 'delusional' approaches to strategy. It offers different ways of seeing, thinking, planning, acting, and mobilising when it comes to making strategy happen in a world of volatility and complexity.

Solving the Strategy Delusion is a comprehensive and insightful remedy for the field of strategic change, and advances the subject in original ways. Everyone working at senior levels of business and policy should read this book. This is a fresh and decisive contribution to the canon of strategy. Kevin Roberts, CEO Worldwide of Saatchi Saatchi Solving the Strategy Delusion opens new windows for looking at realising strategy. It rewrites ingrained behavioural practices to fit today's extraordinary strategic challenges. Fons Trompenaars; Ranked one of the top 50 Most Influential Management Thinkers in 2013 and co-author of Riding the Waves of Culture - Understanding Diversity in Global Business This remarkable book is a survival guide for business leaders who have found the ground shifting quickly beneath their feet. But more than that it's a logical path forward showing us how to realise distinctive strategies by unlocking the energy of people within the organisation. It's clever and timely. Tony Gillies; Editor in Chief, Australian Associated Press Don't even think of embarking on any strategic change effort without reading this book first! It demonstrates not only why conventional planning has become irrelevant but, importantly, how to see, feel, think, and act strategically in today's fast changing environment. James Sutherland; Chief Executive Officer, Cricket Australia Don't be deluded that strategic planning leads to strategic thinking. If strategic changes are to be realised then this book is a must for those who want to make that happen! Professor Philip Dewe; Birkbeck, University of London Solving the Strategy Delusion hits at the very core of challenges that most organisations suffer from in the current era. Too many organisations continue to plod along with old-fashioned thinking even if the paradigms have changed dramatically around them. This pioneering book delves into the causes of such delusions which occur around the much-exploited term of strategy. The authors present a compelling in-depth, incisive, and to the point view based on their vast industry experience and decades of academic pursuit on the subject of strategy and organisational behaviour. This is a can't-put-down book and a must-read for all CEOs and executives wanting to make a real difference! Sanjay Mathur; Vice President, India ASEAN, Foseco at the Vesuvius Group Solving the Strategy Delusion is the ultimate why, what, how, who, and when of strategy realisation in the 21st century. It will inspire, energise and give you a foundation from which to make strategy truly happen. Paul Baxter; Chief Executive and National Commander, New

Zealand Fire Service Almost all organisations these days claim to have a 'strategy' - it would hardly be fashionable to not have one! But how many of these strategies are delusional, destroy value and organisations? Many - according to this original book from Dr Marc Stigter and Sir Cary Cooper, in which they outline cases where ingrained and delusional models of strategy were held on to, despite their shortcomings. They demonstrate how to avoid delusion and achieve strategic wisdom. Such wisdom means ditching most of the security blankets and conventions that managers and leaders still hang on to, even today, such as command and control, managing by the numbers and through stressed out workers. There are better ways and this book elaborates them! Professor Stewart Clegg; University of Technology, Sydney You are about to read a book that gives a fascinating perspective on how it doesn't work and how it should in many organisations when it comes to strategic change! The examples discussed in Solving the Strategy Delusion on how people react to change or keep holding on to the status quo are very recognisable. But in today's landscape this is not sustainable. Dr Marc Stigter and Sir Cary Cooper explore how to bring new strategies to life and think beyond traditional practices and models. I highly recommend this book to all Forward Thinkers and Doers out there! Rick Denekamp; Vice President, Trade Commodity Finance, ING Bank, Netherlands Solving the Strategy Delusion is an outstanding reference for realising strategic change in today's complex environment. Zeger Degraeve; Dean, Melbourne Business School; Dean, Faculty of Business and Economics, The University of Melbourne Dr Marc Stigter and Sir Cary Cooper are to be congratulated for highlighting the need for a more holistic view on strategy - to use an Australian colloquialism they call a spade a bloody shovel! I commend them for that. In today's fast changing environment, we are seduced to a world of short termism without proper regard for or a focus on the future. In such a world, strategy is more often than not relegated to an annual repetition of talkfests followed by a plethora of communications of various forms without action or progress. This book challenges conventional thinking and provides invaluable and practical insights that will enable the reader to mobilise their organisation in a manner that will enable them to realise distinctive strategies which will endure. Highly recommended! Darryl McDonough; Former Chief Executive Partner, Clayton Utz Solving the Strategy Delusion doesn't naively claim to provide all the 'answers' but instead serves as a practical guide for you to challenge the status quo and change the way you think, plan, and put into practice strategic change. This is a book you are going to want to keep with you. Grant Rickard; Vice President, Systems Support - Europe, Middle East Africa, Oracle How do you unlock deep customer insights and realise distinctive strategies? How do you overcome organisational inertia and unleash productive energies? How do you mobilise people who can, know and want to realise strategic change? This remarkable book reveals answers to these questions and in essence shows how to truly strategise from the outside-in rather than inside-out even for biased insiders. Christian Overgaard; President Danfoss China If we're completely honest, most leaders are consumed by the daily battle to ride out the bumps let alone prove we own a confident strategy that will sustain us long into the future. Authors Stigter and Cooper deconstruct the challenges we face inside and out then provide the keys to overcome organisational inertia and unleash productive energies. It's a must. Mick Crowe; Managing Director, GS Engineering Services Solving the Strategy Delusion is a refreshingly new perspective on strategy and strategic change. We are presented with a systematic questioning on how companies tackle strategy and change, create customer value, mobilise people and exercise leadership, through several types of delusions. These topics are then explored in a sensitive and pragmatic fashion. A 'must read' in the strategic management literature. Rita Cunha; Associate Professor of Global Human Resource Management; Nova School of Business and Economics, Lisbon, Portugal Strategy as we know it won't cut it anymore in today's environment. The authors take us through a compelling journey on how to survive. This book is relevant to anyone with a desire to realising strategic change enduringly! Jonathan Sampson; Regional Director, Hays, Japan The book races through how to create distinctive plans with both the customer and the workforce. The detailed glossary offers a mini-MBA of its own! THE TIMES Book of the Week Written concisely and in an engaging style, Stigter and Cooper have produced a very worthwhile book here on the challenges of modern leadership The Irish Times Stigter and Cooper offer very practical insights how to embed strategy into the heart of the everyday running of a business Elite Business Magazine (UK) About the Author Marc Stigter is an international strategist who works with organisations on unlocking deep insights and realising distinctive strategies. His own insights have been gained as a global practitioner at executive level, as a research academic at doctoral level, and as a strategy advisor at organisational level. Marc is an Honorary Senior Fellow at the University of Melbourne's Graduate School of Business and Economics, and an Associate Director at Melbourne Business School. He has held executive positions with blue-chip companies around the world. Sir Cary Cooper is a Distinguished Professor of Organizational Psychology and Health at Lancaster University, UK. He is Chair of the Academy of Social Sciences, the Editor-in-Chief of the scholarly journal Stress and Health and the author of many books on workplace health. Sir Cary received a CBE in 2001 for his contributions to occupational safety and health, and is a regular contributor to radio and TV on topics in occupational psychology and health. In 2014, Sir Cary was awarded a knighthood in the Queen's Birthday Honour's List for his services to the social sciences.
