Gene Bedell : The Millionaire in the Mirror: How to Find Your Passion and Make a Fortune Doing It--Without Quitting Your Day Job before purchasing it in order to gage whether or not it would be worth my time, and all praised The Millionaire in the Mirror: How to Find Your Passion and Make a Fortune Doing It--Without Quitting Your Day Job:

7 of 7 people found the following review helpful. Excellent book
By Frankie
This is possibly the single most information-packed, useful and helpful book in career management I've ever read. It gives an HONEST look at owning your own business, but REAL advice on how to TRULY progress in any career to the very top of your industry. I would recommend this to anyone, and will be ordering several of these as christmas presents to my like-minded friends. I *DESPISE* books that simply try to motivate, give inspirational lines, or tell people what they should already know in order to give them positive reinforcement. This book was filled with ACTUAL strategies, studies, data, and stories. It had literally everything I could ask for and was FULL of useful highlights. On average, I read a 200+ page book and take away 2-3 gems for use in my life. This book is loaded with them. LOADED. Stop reading reviews and just buy it now. The perfect book for anyone - that is ANYONE - whether you're successful now, unhappy now, or haven't even graduated college (or don't plan on going to college). Just get it, and take notes. Much of the info is true and correlates directly with my experience. Buy it.
1 of 1 people found the following review helpful. I think that most books on self-development are useless and full of fluff
By Jared
I have long delayed in the writing of this review, and it matters why. This is real world advice from a CEO and founder of multiple companies. I think that most books on self-development are useless and full of fluff; I actually reread this book and Mr. Bedell's other book to make sure I wouldn't be wasting anyone's time. That being said these two books are amazing and I have bought additional copies to give to my clients, friends, and family. This book will help better your life.
5 of 5 people found the following review helpful. Great reality check
By Jo Warbington
Over the many years of selling for a living I have always been on the look out for good reads to help me be a better professional and person. Now that I have sort of reached my latter years life takes on new meanings. Mr. Bedell must have been looking in my window all these years because he pegged me all too accurately. I have to say that sometimes it broke my heart to read his words but I knew he was right. If you want to see life as it is, how it can be and most importantly how it should be get the book and study it. There are many bright people writing great books but to find one that has the experience to say, "I have been there and done that" it is this author. For a young professional looking for advice get the book. For a seasoned vet, with years left on your career, get the book. For us old guys that want to hear it like it is get the book. Also, I will say that as busy as Mr. Bedell is he took the time to answer my email. Try that with other writers.
Respectfully,
Larry Warbington

Learn the keys to Outstanding Success and reveal the millionaire in your mirror
Despite never being, as he admits, the best communicator, the most talented manager, or the smartest guy in the room, Gene Bedell quickly worked his way up the corporate ladder; accumulating career earnings that put him among the country's top one percent of earners while doing what he loved and always putting family first. By looking at his own career and the careers of others who have achieved Outstanding Success; people who all started with nothing; he found it was possible for those who put their minds to it to become wealthy while spending their careers doing work they love. Now, in *The Millionaire in the Mirror*, Bedell reveals how you too can find career fulfillment while earning millions; without social connections, an Ivy League education, an MBA, or the kind of earth-shattering managerial talent that makes the world take notice; and how you can do it without destroying your personal life, resorting to hucksters' get-rich-quick schemes, or opting out of a traditional career path. Inside you'll find the seven success strategies that will revitalize your days at work, helpful tips for getting "unstuck" at any age or phase of your career, and answers to the crucial career questions that are asked far too infrequently. Approachable but authoritative, this is the book for everyday people who have extraordinary potential. If you have the desire and drive to achieve truly Outstanding Success, you can turn the person you see in the mirror into the millionaire you're destined to become.

About the Author Gene Bedell is cofounder of Signature Coaching, a counseling and consulting group, and is the author of *The Computer Solution* and *Three Steps to Yes*. He has had a career that puts him among the top one percent of earners nationwide while still enjoying both his work and his family, with whom he lives in South Carolina.
