vice-presidential nominee for the Libertarian Party in 2008. He is also known as the "Capitalist Evangelist" and this book is certainly inspirational in tone. He has a tremendous amount of information, all backed by footnotes, and seems more practical than most libertarians. The book is a bit repetitious but certainly worth reading. The book talks about the "murder" of the middle class and follows this theme with chapters like "motive" and "scene of the crime." The main point is that America is heading towards a two-class society, ending up with the rich and the poor after basically eliminating the middle class. Root believes this is a conspiracy but it would work the same way as an alliance of interests. The main parties behind this are big government and big business. The more rules, regulations, and taxes imposed on business, the more big business benefits because it can afford to pay for these while small businesses are driven out of business. Big government benefits from the increased taxes because it can then put more people on some type of welfare, who then become dependent on government, and re-elect the politicians who promise more welfare. He attended Columbia at the same time Obama did and describes the Marxist atmosphere at the school which influenced Obama. He believes Obama's ultimate goal is to establish a Marxist state. But now the Democrats first have to ally themselves with big business to destroy the middle class, especially the small business owners who value independence and are opposed to government control, and thus eliminate much of the conservative opposition. A mundane example of how big business benefits co-operating with big government to eliminate competition from small businesses is General Electric. It is one of the main beneficiaries and supporters of the government's banning of cheap incandescent bulbs as General Electric can now manufacture high-profit fluorescent bulbs instead of low-profit bulbs. Small manufacturers who cannot manufacture the new bulbs go out of business. Meanwhile, the government derives more power and money through new welfare programs, with Obamacare being the latest major example. Now more people are dependent on the government. This program allows the government to give out more subsidies and benefits to its supporters. An example he gives is that the \$500 million contract for the Obamacare disastrous website was given to one of Michelle Obama's black college friends from Princeton now living in Canada while American firms could have done the job a lot cheaper. It is less than 300 years since the American Revolution and US Constitution were established to create an alternative to the United Kingdom which consisted mostly of an aristocracy and a peasantry. America became that alternative with a strong middle class based on free enterprise and individual freedom. It is obviously now going in the opposite direction with an increasingly dictatorial government, especially the federal judiciary. Root does provide one proverb that is surprisingly practical for a libertarian. He says that in politics the messenger is more important than the message. This is certainly true today with Donald Trump who seems to have the leadership talents necessary to reverse America's slide into bankrupt socialism. The idea that the candidate who checks the most conservative boxes on current issues is the best candidate has never worked. 5 of 5 people found the following review helpful. Excellent presentation on the root cause of the middle class decline By Neil Karl Excellent presentation for the argument that the policies of President Obama and the Democratic party are not to help the middle class, but to cause great damage. Every time that President Obama or the Democrats say that they are enacting legislation to help the middle class, the middle class gets hurt. President Obama and the Democrats are making the American Dream disappear. 2 of 2 people found the following review helpful. On Kindle it is easy to tap jump ref # By Ernest C.
