Peter Joseph : The New Human Rights Movement: Reinventing the Economy to End Oppression before purchasing it in order to gage whether or not it would be worth my time, and all praised The New Human Rights Movement: Reinventing the Economy to End Oppression:

60 of 60 people found the following review helpful. Nice work and thank youBy CustomerPeter Joseph's work is the most honest, inspirational, liberating, and compassionate media I have come across. I consider myself a business professional, one-time theist, and a veteran of corporate politics. His work not only identifies the problems of these

modern systems that leave so many of us behind, but it also instills a sense of urgency while also instilling a sense of peace, inspiring oneself to serve a much grander purpose than just self placation. His work transcends ruling political and economic ideologies while providing realistic and inspirational solutions for everyone. I don't say this lightly as I am skeptical of anything and everything, but Peter's work holds ground under the scrutiny of social science and methodology. He has become a hero of mine in many many ways. Nice work and thank you, Peter. North America 57 of 59 people found the following review helpful. MUST READ - The most objective, scientific, humanly and earthly-relevant book of the century. By Customer This is perhaps the most important book of our times. It is said that you cannot learn truth through the lens of a lie, this book provides the lens necessary to understand every major global issue we face as human beings and as a society. At a time when false symbolism is all and we are witnessing the implosion of truth, this book scientifically and methodologically cuts through the formaldehyde of identity politics, capitalism-spawned abominations, concealed class warfare, structural violence, systematic poverty, ceaseless misinformation, and droves of opinion-pissing human clickbaiters by giving the reader a deep understanding of causality and backing those conclusions with empirical evidence. It is both a treasure-trove of information and more importantly, an action plan to end the deathscape of endemic poverty, unsustainable wealth inequality, and environmental destruction. Not only should the public be aware of the information provided in this book, but it should be required reading and placed on the desks of every major global institution, governing bodies, educational institutions, think tanks, and so on. It is our only chance at moving towards a survivable future. Eternally thankful for this book and your relentless dedication to human progress, Peter Joseph. 29 of 29 people found the following review helpful. Toward an Ideal By Customer Peter Joseph is able to articulate the issues that society faces today in a way that few others are able to. He brings to light many human rights abuses that we face and often unwittingly support on an ongoing global scale, but beyond bringing them to light, he sheds some glimmer of hope how they can be ameliorated by a paradigm shift in our values and old ways of thinking. With the inclusion of rigorous research and detail, Peter has put into words what many activists, idealists, and even ordinary citizens have been thinking for a long time, and that's how to truly address the most fundamental problems that the world faces today, not just on the superficial level that usual politics tosses about, but really getting at the root in order to make a significant constructive change for all humans.

Society is broken. We can design our way to a better one. In our interconnected world, self-interest and social-interest are rapidly becoming indistinguishable. If current negative trajectories remain, including growing climate destabilization, biodiversity loss, and economic inequality, an impending future of ecological collapse and societal destabilization will make "personal success" virtually meaningless. Yet our broken social system incentivizes behavior that will only make our problems worse. If true human rights progress is to be achieved today, it is time we dig deeper—rethinking the very foundation of our social system. In this engaging, important work, Peter Joseph, founder of the world's largest grassroots social movement—The Zeitgeist Movement—draws from economics, history, philosophy, and modern public-health research to present a bold case for rethinking activism in the 21st century. Arguing against the long-standing narrative of universal scarcity and other pervasive myths that defend the current state of affairs, *The New Human Rights Movement* illuminates the structural causes of poverty, social oppression, and the ongoing degradation of public health, and ultimately presents the case for an updated economic approach. Joseph explores the potential of this grand shift and how we can design our way to a world where the human family has become truly sustainable. *The New Human Rights Movement* reveals the critical importance of a unified activism working to overcome the inherent injustice of our system. This book warns against what is in store if we continue to ignore the flaws of our socioeconomic approach, while also revealing the bright and expansive future possible if we succeed. Will you join the movement?

"This book is a fascinating read, and a vitally important one for anyone who is tired of the status quo, seeks to understand why it is so entrenched, and wants to do something about it." *New York Journal of Books*
