scholarship like this which continues to resurrect this multi-cultural and ethnic past.

The Ottoman East — what is also called 'Western Armenia', 'Northern Kurdistan', or 'Eastern Anatolia' — compared to other peripheries of the Ottoman Empire, has received very little attention in Ottoman historiography. So-called taboo subjects such as the fate of Ottoman Armenians and the 'Kurdish Question' during the latter years of the Ottoman Empire have contributed to this dearth of analysis. By integrating the Armenian and Kurdish elements into the study of the Ottoman Empire, this book seeks to emphasise the interaction of different ethno-religious groups.

'This is a very unique and valuable study on the nineteenth-century Ottoman East ... we learn about the local physical spaces, the local actors as they negotiate their identities and relations with the imperial state and, in doing so, shape their social and physical environment ... an excellent volume.' - Fatma Muge Gocek, Professor of Sociology and Women's Studies, University of Michigan, 'An extraordinarily important project ... Ottoman studies has been growing exponentially in the last decade, and among the most important developments has been the study of regions and the integration of the histories of the various peoples of the empire into a broader Ottoman history. Left out to a large degree has been the complex histories of the eastern provinces, that is "historic Armenia," current-day Kurdistan. It was in this region where the international diplomatic struggles known as "the Eastern Question" or "Armenian Question" focused. It was here that the genocide of Armenians and Assyrians took place in 1915-6. Yet the background to those larger issues and events has not been adequately explored. This volume is the first serious investigation into the region and makes a significant contribution to our knowledge.' - Ronald Grigor Suny, Charles Tilly Collegiate Professor of Social and Political History, University of Michigan
