The Public Manager Case Book is a collection of eight public administration cases that allows students to practice the decision-making skills they will need in their jobs as public managers. Each case focuses on the local administrative issues managers most often face in their day-to-day responsibilities, and each encourages students to collaborate with

others in order to gain the necessary cooperation and information. The cases are multi-dimensional and challenge students and professors to draw from a variety of knowledge areas to develop alternative recommendations, decisions, or actions.
