As someone deeply interested in Japan, and also working on startups, I'm finding this fascinating. Lots of inspiring stories here for business creators, and some really useful insights into the tech world in Tokyo. I had been looking for something like this for a long time. It's very hard to find up-to-date info on Japan, especially the tech sector. Most books are trapped in the 80s and everyone has turned to

China, but Japan still delivers so much value. It would be great if they did an audiobook, so we could listen to these conversations podcast-style. 0 of 0 people found the following review helpful.
